<b>Texas Commission on Environmental Quality Chapter 285 - On-Site Sewage Facilities</b>			
(35) Maintenance--Required or routine performance checks, examinations, upkeep, cleaning, or mechanical adjustments to an on-site sewage facility, including replacement of pumps, filters, aerator lines, valves, or electrical components. Maintenance does not include alterations.			
(36) Maintenance findings--The results of a required performance check or component examination on a specific on-site sewage facility.			
(37) Maintenance provider--An individual who maintains on-site sewage facilities for compensation. Through August 31, 2009, a maintenance company is a person or business that maintains on-site sewage facilities for compensation.			
(38) Maintenance technician--An individual who holds a valid registration issued by the executive director to maintain on-site sewage facilities and works under a maintenance provider.			
Gillespie County has provided this list to those parties who may have need for an OSSF Aerobic Maintenance contractor. Gillespie County neither endorses the professionals on this list nor does Gillespie County imply that the above represents professions recognized to do business in Gillespie County.
